6227.0.55.003 - Education and Work, Australia - Additional data cubes, May 2013

Latest ISSUE Released at 11:30 AM (CANBERRA TIME) 29/11/2013 Final

Summary

About this Release

These data cubes provide detailed information from the Survey of Education and Work (cat. no. 6227.0) on key participation and attainment indicators in education and training. From the 2014 release of the Survey of Education and Work, the data cubes previously published under this catalogue number 6227.0.55.003 will be available in the main publication (cat. no. 6227.0).

Changes this Issue

This year the Survey of Education and Work data cube suite includes a new data cube:

- Fully engaged through formal study and/or employment, persons not in school study aged 15–24 years

The data cube 'Fully engaged through formal study and/or employment, persons 15–64 years' contains an expanded age range from what was published in the 2012 data cube.

All data cubes contain an additional demographic variable – Remoteness areas. Data from 2010 to 2013 are published by Remoteness area.

In addition, minor changes to wording occur in the data cubes on participation and engagement. The term 'formal study' replaces the previous term 'study for a qualification'. This revision is intended to more accurately illustrate what the category constitutes and does not represent a change in data. For further information on the term 'formal study' refer to the Glossary of 6227.0 — Education and Work, Australia, May 2013.

History of Changes

This document was added or updated on 16/06/2014.

16/06/2014

The downloads page has been updated to include a note indicating that from 2013, persons

who were permanently unable to work (who were previously excluded) are included in the data.

Explanatory Notes

Explanatory Notes

EXPLANATORY NOTES

1 This publication contains results from the annual Survey of Education and Work (SEW) conducted throughout Australia in May 2013 as a supplement to the monthly Labour Force Survey (LFS).

2 The SEW provides a range of key indicators of educational participation and attainment of persons aged 15–74 years, along with data on people's transition between education and work. The annual time series allows for ongoing monitoring of: people presently participating in education; level of highest non-school qualification; level of highest educational attainment; characteristics of people's transition between education and work; and data on apprentices.

3 The publication Labour Force, Australia (cat. no. 6202.0) contains information about survey design, sample redesign, scope, coverage and population benchmarks relevant to the monthly LFS, which also apply to supplementary surveys. It also contains definitions of demographic and labour force characteristics.

ADDITIONAL INFORMATION

The publication Education and Work, Australia (cat. no. 6227.0) contains information about the SEW. It includes the following sections:

Explanatory Notes

Includes: **Scope and Coverage; Data Collection; Estimation Method; Reliability of the Estimates; Data Comparability; Classifications; Products and Services**

Glossary

Abbreviations

Quality Declarations - Summary

Includes: **Institutional Environment; Timeliness; Accuracy; Coherence; Interpretability; Accessibility**

Data quality (Technical Note)

Includes: **Reliability of the Estimates; Calculation of Standard Error; Proportion and Percentages; Differences; Significance Testing; Other Sources of Error**

Data Cubes (I-Note) - Data Cubes

Estimates for 2013 include people who are permanently unable to work. For further

information refer to the Scope and Coverage section of the Explanatory Notes (cat. no. 6227.0).
